

## Enlighten to Present Virtually at the Energy Storage Canada Conference

**Calgary, Alberta** – September 28, 2021: Enlighten Innovations Inc. (“Enlighten,” the “Company”), a game changing long duration battery solution for commercial and utility-scale energy storage applications, today announced that Steve Reynish, chief executive officer and president, will present virtually at the Energy Storage Canada’s conference, hosted by Hydro One taking place September 29-30, 2021.

A replay of Enlighten’s discussion on Canada’s energy storage supply chain will be available at <https://energystoragecanada.org/conference> within three days following the event and will also be posted on the Company’s website at <https://enlighteninc.com/company-overview/>.

### About Enlighten

Enlighten Innovations Inc. is a leading clean-energy technology company headquartered in Alberta, Canada, and Denver, Colorado. Our team has extensive expertise in building companies and large projects and has deep experience in sodium/sulphur battery technology and applications. We have been engaged in the research and delivery of clean energy technology for decades, working to meet ever-changing global energy needs and accelerate a net-zero world.
